

SUMMARY

Full Stack Developer with 2+ years of experience designing and building scalable web platforms using Node.js, TypeScript, React, Next.js, PostgreSQL, and MySQL. Skilled in layered backend architecture (Controller-Service-Repository), REST API design, RBAC and authentication systems, payment integrations, and Linux/Docker-based deployment workflows. Delivered production systems across EdTech, e-commerce, supply chain, workforce management, and AI-powered document automation domains.

EXPERIENCE

Full Stack Developer
Mindrops

10/2024 – Present | New Delhi

Ventura – Educational & Career Platform

- Built a role-based access control (RBAC) system with granular permission levels across student, corporate, and admin roles, backed by JWT authentication.
- Designed REST APIs using Node.js, Express, Prisma, and PostgreSQL with layered Controller-Service-Repository architecture and Zod request validation.
- Implemented task and ideation lifecycle workflows including submission review, winner declaration, and points disbursement via cron-driven status automation.
- Developed gamification features including points wallet, badge reconciliation jobs, and tier upgrades to drive user engagement.

Face Recognition Attendance Application

- Built a GPS-verified, facial recognition-based attendance tracking application integrating Google location services for accurate clock-in/out verification.
- Implemented reverse geocoding and location validation logic to confirm employee presence at registered sites, reducing manual attendance errors.
- Designed APIs for attendance status tracking, history logs, and admin-facing reporting dashboards.

E-commerce Application

- Developed a full-featured e-commerce platform supporting products and product variants, with master data management for key modules.
- Built an order management system with integrated shipping via Shiprocket, covering pickup location and AWB assignment workflows.
- Integrated RazorPay and PayU for secure payment processing and order reconciliation.

AI-Powered Invoice Management Platform

- Designed an AI-powered invoice management platform that automates extraction, categorization, and lifecycle tracking of vendor invoices uploaded via web and mobile.
- Integrated OCR and intelligent document processing to extract key invoice fields, paired with a human validation layer for reviewing and confirming extracted data before submission.
- Built a centralized, searchable invoice repository with standardized categorization, role-based access control, and secure document storage to support audit and compliance needs.
- Implemented invoice lifecycle management covering review, editing, re-processing, and status tracking, replacing manual data entry with a faster, scalable digital workflow.

Ecommerce Account Manager
UB Enterprises

08/2022 – 01/2024 | Kanpur

- Boosted sales by leveraging data-driven strategies to understand market trends and customer preferences.
- Implemented efficient workflows for seller account management, enhancing organizational revenue.
- Conducted thorough analysis and reporting to optimize product listings and promotional campaigns.

EDUCATION

Masai School
Full Stack Development

2024

DAV College, Kanpur
B.Sc. Information Technology

05/2022

TECHNICAL SKILLS

Languages & Frameworks

JavaScript, TypeScript, Node.js, Express.js, React, Redux, Next.js, HTML5, CSS3

DevOps & Tools

Docker, Linux, Git, GitHub Actions (CI/CD), PM2, NPM, Postman

Soft Skills

Teamwork, Effective Communication, Problem Solving

Databases

PostgreSQL, MySQL, MongoDB, Prisma ORM, Redis, Supabase

Integrations & Other

RazorPay, PayU, Shiprocket, RBAC & JWT Authentication, Responsive Web Design, REST APIs

ACCOMPLISHMENTS

Best Employee for the Quarter

Apr–Jun
